PROFESSIONAL SUMMARY

Senior Frontend Developer with **7+ years of experience building** scalable, high-performance web applications using React.js and modern JavaScript. Strong expertise in **component-driven architecture, state management, UI/UX optimization, and secure product-based applications**. Proven ability to lead frontend development, collaborate with cross-functional teams, and deliver production-ready solutions in fast-paced environments.

TECHNICAL SKILLS

Frontend
- React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Material UI, Redux, jQuery, Bootstrap
- Performance Optimization, Cross-Browser Compatibility, Joint.js, Ant Design, REST API
- Responsive Design

Tools & Ecosystem
- NPM, Yarn, PNPM
- Git / Version Control
- REST API Integration, Postman, Swagger

Data Visualization
- D3.js, Three.js (Basic)

Backend & Supporting Skills (Working Knowledge Only)
- Node.js, Express, MongoDB, SQL
- Docker (Basic)
- PHP, CodeIgniter

PROFESSIONAL EXPERIENCE

Senior Frontend Developer
Zeronsec India Pvt. Ltd. | Aug 2018 – Feb 2026
Zeronsec is a product-based company focused on **security-driven solutions**.
Key Responsibilities & Achievements:
- Designed and developed **scalable React.js applications** for multiple security-focused products.
- Built reusable, modular components to improve **development speed and maintainability**.
- Optimized application performance, reducing load time ~30% and improving UI responsiveness.
- Collaborated with backend, security, and product teams to deliver **secure, production-ready features**.
- Ensured best practices in **code quality, accessibility, and responsive design**.
- Actively involved in requirement analysis, UI implementation, and deployment support.

Current Projects (React.js):
- **Ekasha**
- **Anrita**
- **Threati**

Completed Projects:
- **Zeronsec Corporate Website** – https://www.zeronsec.com

PROJECT HIGHLIGHTS

Ekasha – Incident Management & SOAR Platform

A comprehensive **Incident Management & SOAR (Security Orchestration, Automation, and Response)** platform that centralizes incident analysis, prioritization, investigation, and automated response workflows, helping security teams streamline operations and manage the full incident lifecycle with real-time collaboration and KPI-driven dashboards.
Contribution: Built responsive React.js UI components, implemented state management, and optimized performance for dashboards and alert workflows.

Anrita – SIEM (Security Information & Event Management)

A **next-generation SIEM (Security Information & Event Management)** solution that provides real-time threat detection, monitoring, and advanced analytics across networks, endpoints, and cloud systems. It consolidates log data, visualizes security events via dashboards, and empowers analysts with actionable threat insights and customized reporting.
Contribution: Developed core frontend modules, integrated complex data visualizations, and ensured real-time interaction with backend systems.

Threati – Threat Intelligence Platform

A platform designed for **threat intelligence gathering and analysis**, helping organizations identify, assess, and respond to emerging cyber threats by consuming threat feeds and generating actionable insights that drive proactive security decisions.
Contribution: Led frontend development using React.js, crafted interactive threat dashboards, and improved usability for security analysts.

EDUCATIONS

B.E. Computer Engineering (June 2019) - Noble Group of Institutions, Junagadh

ACHIEVEMENTS & CERTIFICATIONS
- 🏆 **3rd Runner-Up**, RELAYCODING Event – GTU Techfest (Zonal)

LANGUAGES
- Gujarati (Native)
- Hindi (Professional)
- English (Professional Working Proficiency)

CORE FOCUS AREAS

- Frontend Architecture.
- Advanced React JS Development.
- Performance Optimization
- Full-Stack Development
